<https://www.securityweek2016.tu-darmstadt.de/spw2016/discover-darmstadt/>

** Only 25 minutes from FRA airport and well connected to European capitals

The European Workshop on Usable Security (EuroUSEC) is launching as the European sister of the established USEC workshop. EuroUSEC brings together security and usability experts from around the world to discuss recent advances and new perspectives on research in human factors in security and privacy. The aim of this workshop is to bring together researchers from different areas of computer science such as security, cryptography, visualisation, artificial intelligence and machine learning as well as researchers from other domains such as psychology, social science and economics. The EuroUSEC 2016 workshop will be held on July 18, 2016.

EuroUSEC has been accepted as the pre-workshop of the Privacy Enhancing Technologies Symposium (PETS) at the Security and Privacy Week 2016 (<https://spw2016.de>), along with some 9 specialized security and privacy conferences and workshops - will be held in the darmstadtium science and congress center, Darmstadt, Germany.

The program of EuroUSEC consists of a single track of 10 high quality papers. The EuroUSEC keynotes will be given by Denis Fischbacher-Smith and Stuart Macdonald. Subsequent to the Workshop, at 6:00 h (p.m.), the EuroUSEC Community is invited to get together at the Bistro Moller, located at the Welcome Hotel Darmstadt. This social event gives the opportunity to follow-up on the EuroUSEC in a pleasant atmosphere, as an enjoyable completion to the workshop. The Bistro offers drinks and meals à la carte.

---We would be delighted to welcome you to Darmstadt to attend EuroUSEC with us. *We still have free registration vouchers available, hence do not hesitate to contact us.*---

As part of the Security and Privacy Week, EuroUSEC participants can acquire the Security Week Pass which gives access to PETS 2016 talks, eight workshops and more. Don't miss the opportunity to get in touch with the leading privacy researches.

Steering Committee:

Andrew A. Adams, Meiji University

Jim Blythe, University of Southern California

Jean Camp, Indiana University

Angela Sasse, University College London

Matthew Smith, Bonn University

Program Committee Chairs:
Karen Renaud, University of Glasgow
Melanie Volkamer, TU Darmstadt & Karlstad University
